

## English Essay

### Try Try and you will succeed

Many people want to achieve many things. But these achievements become real when we try. We cannot succeed without trying. Many people want to achieve many things like Fame, Power and excellence in various activities. Here is an incident where I tried until I achieved my goal.

One day when I was younger I wanted to paint a picture. I had visited many art galleries and seen many beautiful paintings and aspired to paint well. One day when my cousin came to my house to complete his Painting work, I asked him whether he would teach me how to paint. He gladly answered that he would help me.

So I took out my elder brother's old paints. Luckily the paints were not dry. My cousin showed me how to use the paints. I used my brush to paint and after my completing the design I felt it was done untidily and was a total mess, so I decided to give up. I started watching television but my cousin told me that I should not give up. He also told me several stories about how he painted. He reminded me of the saying "Try Try and you will succeed"

My spirits rose when I heard these words. This time I vowed that I would paint better than all the other paintings that I had attempted before. I took a brush and dipped it in paint and Lo!!! I painted such a nice picture that my parents and my cousin were astounded. They couldn't believe that I had painted extremely well. Now if you visit my drawing room you will see the picture pinned up.

From this experience I can confidently tell you that anyone who gives up loses an opportunity to improve himself. So always try

harder you will reach the top. I conclude by saying “ Failure is the mother of success”.
